

Hidden Infections – Lyme, Co-Infections and Viruses that sabotage our clinical results

Dr. Jason Bachewich ND (BSc.)

Biography:

Dr. Bachewich obtained a Bachelor of Science, Honours, in Biological Science from the Brandon University. Upon graduation, he completed a four-year program in Naturopathic Medicine at the Canadian College of Naturopathic Medicine (CCNM) in Toronto, Ontario.

During the last 12 years, Dr. Bachewich has worked as a consultant and lecturer for many of the largest nutraceutical companies in North America and has sat on the board of the Manitoba Naturopathic Association as secretary and president.

He has also lectured internationally and nationally on a variety of topics related to functional medicine and Naturopathic Medicine. Jason is a regular contributor on the Winnipeg CTV morning show, CityTV's breakfast television and enjoys presenting corporate health seminars.

Presentation description:

Many diseases such as MS, Hashimoto's, Chronic Fatigue and Fibromyalgia do not respond to traditional treatment protocols. Getting to the root cause of these diseases as well as learning how to diagnose, select appropriate labs, interpret those labs and choosing appropriate treatment methods including prescription meds will be covered in this session.

This presentation will start by reviewing diseases that are often misdiagnosed as autoimmune diseases but instead can be infectious in nature. We will go through a checklist of symptoms and blood lab work results that should trigger you to investigate infectious disease as the root of the problem. We will then discuss provincial lab testing options as well as international labs – going through results and teaching the doctors which labs to use depending on their clinical picture and at different stages of treatment. I will go through clinical examples of the different testing options, interpretation of the results and continue with a checklist of treatment options depending on the outcomes.
